Subject No. 46.

The Head Masters of High Schools and Collegiate High Schools should not detain boys from appearing for School Final and Entrance Examinations.

Messrs. C. Subba Rao, Shimoga District Board, and A. Anantaiya, Shimoga Taluk.

Summary of Representation.

When Mr. C. R. Reddy was our Inspector-General of Education, he had issued a circular to all the Head Masters not to detain the boys from appearing for examinations. This was founded on good principles. The class examinations for selecting the boys for School Final and Entrance Examinations are held about three months prior to the Public and University Entrance Examinations. There is no guarantee that all the boys selected by the Head Masters will secure a pass. It is not right that a chance to students should be denied to them.

the age of Science and research, and if the Government should postpone the establishment of a Science Section, the *malnad* students will be put to much loss and inconvenience and higher study in Science will be denied to them. The question of financial stringency should not come in the way. If this section is established, the school will not only attract students from other parts of the Nagar Division but also help to a very great extent the students who pass the School Final Examination to continue their studies in this very High School.

Subject No. 55.

Grant of more backward scholarships to students in primary classes.

Messrs. B. Rangarajaiya and Nandipur Kallegowda, Mudgere Taluk.

Summary of Representation.

Great encouragement is being given to higher education by the grant of a greater proportion of backward scholarships to students studying in higher classes, though the percentage of the primary education is below 90 per cent. Consequently, the poor people are obliged to give up their primary education for want of scholarships. The grant of scholarships for higher study may be discontinued and the amount thus saved utilised for the primary education of the poor till such time that the population who have and who will have received pimary education comes up to 50 per cent of the total population.
